

Expense Reduction Analysts Fleet Testimonial

CLIENT: Imtech
SECTOR: Technical
COST CATEGORIES: Fleet Cost Management

SUMMARY OF SAVINGS

Overall **16%**

THE CHALLENGE

Respected technical services provider Imtech UK contracted ERA to undertake a comprehensive evaluation of their 1100 car and van fleet which is split between a number of operating divisions.

The project included an exhaustive assessment of manufacturers, leasing suppliers, fuel and short term hire activity.

Following a thorough process, a revised policy centered on whole life cost has been introduced with core vehicle supply consolidated to a single approved supplier for vehicle provision. Both short term hire and fuel projects resulted in new enhanced supply solutions adding further value to the programme.

"We appointed ERA Fleet Cost Management to review the market on our behalf utilising their expertise to drive efficiencies and engage the best partners for our varying fleet requirements. In addition to the ongoing substantial expense reduction achieved across all the categories that were reviewed, the ERA process has provided true transparency and clarity to the complex nature of fleet operations."
